Nuclear Engineering and Design 176 (1997) 305–306

Nuclear Engineering and Design

Subject Index of Volume 176

Engineering mechanics

Reliability-based assessment of integrity of bonded prestressed concrete containment structures 176 (1997) 247
Prediction of pressure tube fretting-wear damage due to fuel vibration 176 (1997) 261

Mechanical design, component fabrication and testing

Benchmark calculations for mechanical stresses upon a transport cask 176 (1997) 207
Waveguide ultrasonic liquid level transducer for nuclear power plant steam generator 176 (1997) 225
A continuum model for cracked UO_2 fuel 176 (1997) 273

Reactor concepts and systems analysis

Application of Leak-Before-Break Concept in VVER 440-230 Results and consequences for TACIS-program 91/1.2 176 (1997) 285

Structural design, construction methods and testing

Experiment and numerical simulation of double-layered RC plates under impact loadings 176 (1997) 195
Analytical study on dynamic buckling of reactor containment vessel 176 (1997) 215
